

Infrastructure with aceInfrastructure

Businesses rely on properly configured networks using hardware and software components to meet their specific needs. It's complicated but done right it will make everyone's job easier, increase productivity and customer satisfaction. ACE can design and implement your network technology requirements. We can also setup and install enhancements like video surveillance, keycard door security, in-ceiling and conference room audio/video, and teleconferencing, integrating them into your overall network environment with ongoing monitoring and maintenance.

aceInfrastructure options include:

- ✓ Design, engineering, installation and cabling for audio, data, security, video, and voice
- ✓ Wired and wireless networks
- ✓ Planning and installation of security cameras and network video recorders (NVR)
- ✓ Implementation of a keycard entry system for your building and staff
- ✓ Ongoing management and maintenance

Additional ACE IT Services

aceRemoteIT is a complete managed IT service for businesses with 5-100 PCs. Your business shares our centralized computer infrastructure and network resources at a fraction of the cost of purchasing your own. We can also install and service additional networks, LANs, PCs, and servers for you, if you so choose.

aceCloud gives you access to our cloud server and a host of Internet applications that will make you and your team more collaborative and more productive.

aceVoIP Save 20-50% off your current phone bill. Eliminate the standard copper or other on premise PBX phone systems. Choose **aceVoIP**, our Voice over Internet Protocol (VoIP) phone service and get the phone features you need at a discount.

aceGuardian provides the data backup and security every organization needs. We monitor your servers and network 24/7/365, we backup your data automatically, and we make sure your PCs are protected against security threats.
